Internship Offer Letter

Student Name : RAJAN PANDIT
Stream : B.Tech
Branch : B.Tech(Computer Science and Engineering)
Institute Name : SRM Institute of Science and Technology, Kattankulathur
Internship Domain : Google Cloud Data Analytics
Internship Duration : April 2026 - June 2026
AICTE Student ID : STU672c51242be441730957604

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
Week 1	Introduction to Data Analytics in Google Cloud	Introduces cloud data analytics, covering roles, cloud architecture, BigQuery, Cloud Storage, AI basics, deployment models, and benefits across industries.
Week 2	Introduction to Data Analytics in Google Cloud	Cloud data management and analysis, including lifecycle, automation, retention, access control, stakeholder collaboration, BigQuery, Dataproc, and generative AI applications.
Week 3	Data Management and Storage in the Cloud	Cloud data storage, lakehouse architecture, BigQuery, GCS, DataProc, batch/streaming processing, governance, catalogs, and data organization best practices.
Week 4	Data Management and Storage in the Cloud	Data discovery, curation, and unification with Dataplex; schema management and SQL in BigQuery; partitioning tables; machine learning with Vertex AI; Dataproc cluster creation and management.
Week 5	Data Transformation in the Cloud	Data collection, cleaning, transformation, ETL/ELT pipelines, aggregation, joins, derivation, anonymization, and visualization using BigQuery to drive business insights.
Week 6	The Power of Storytelling: How to Visualize Data in the Cloud	Cloud data visualization, storytelling, UX/UI design, dashboard creation, BI techniques, wireframing, data exploration, and stakeholder-aligned reporting.
Week 7	The Power of Storytelling: How to Visualize Data in the Cloud	Cloud data modeling, Looker Studio and Enterprise dashboards, LookML, IDE usage, derived tables, AI-driven visualizations, collaboration, and performance optimization.
Week 8	Put It All Together: Prepare for a Cloud Data Analyst Job	Capstone project, full data lifecycle, BigQuery, Looker Enterprise, resume updates, interview preparation, portfolio building, and job readiness for cloud data analysts.
Final Credential Validation / Internship Grade Point Assessment		

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.
